Name of the book: The Existence of God

Writer: Abu Abdullah

First Publication: 2024, (1445 AH)

.....

Important Note

- 1) In the writings we have honestly tried to clarify the truth as much as possible. But human effort is not free from errors. Therefore, if there is any error, it is not intentional, but it is accidental. Therefore, if there is any deficiency, please inform us, we will be very grateful to you.
- 2) Love and respect for the Creator and the best of His creations, the Prophets (peace be upon them) is the basic condition of faith. Moreover, the honor and respect of the pious and righteous people is also obligatory on us. Therefore, in the selection of words, we have tried to observe all possible ethics and respect. But the content on social media can be easily changed. Therefore, if any objectionable words based on profanity are seen in our content, then it must have been distorted by someone in our writing. So in this situation. You must confirm from us.

List of Acronyms

S/N	Word	Meaning
1	Allah	The personal name of Creator of the universe
2	SWT	Sunhanhoo –Wa-Ta’ala Title to glorify the Creator
3	Muhammad (PBUH)	The last messenger of God
4	PBUH	Peace be upon him
5	Quran	Divine book, last final message from Creator to humanity revealed on Prophet Hazrat Muhammad (PBUH)
6	Hadith	Saying of Prophet (PBUH)
7	Sunnah	The way of Prophet (PBUH)
8	Tirmidhi	Hadith book, collection of Aahadith
9	Bible	Divine book revealed to Prophet Isa (Jesus Christ)- PBUH
10	Prophets	Messengers (chosen people) sent by Creator for the guidance of humanity
11	Hazrat	Title used to honour great persons
12	Ameen	"O Allah accept my call" and is said after a dua (prayer)
13	Hazrat Abu Bakar	A close companion of Prophet Hazrat Muhammad (PBUH)
14	Hazrat Ibn-e-Abbas	Companion of Prophet Hazrat Muhammad (PBUH) & great scholar of Quran
15	Abu-Jahel	The worst enemy of Prophet Hazrat Muhammad (PBUH)

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

(In the name of Allah, the Most Gracious, the Most Merciful)

Starting Words

Generally, people get familiar with the name of God (Allah) from their home and environment by birth, but generally they remain deprived of the belief of His Existence and in such uncertain situation of this mortal life, they leave this world on same condition.

Many people have worked on the subject topic, but our aim is to briefly describe undeniable arguments and evidences regarding the “Existence of God” in a simple and common way so that common people can also benefit from it and by the study of which the belief in the God can be fully attained and no room for doubt be left.

This book! It is useful for Muslims and non-Muslims alike. Some people think that what is the need of Muslims for such writings? as they already believe in Allah. True belief in Allah is needed by everyone that is why Allah explained many reasons for it in the Holy Quran and invited everyone to think on it.

Today, if Muslims had sound faith in Allah, they do not disobey God, their lives would have been set in the right direction, success would have been their destiny and they would have lived with honor and dignity in the world!

Chapter-1

Basic Essential Information

Before going into detail, let 1st go through some essential basic information:

1. The Main Reason for Being Ignorant of Reality

Our actions depend on three things: (a) Knowledge (b) Observation & (c) Belief

For example: If you avoid fire and are afraid of snakes, it is because you have come to know that fire burns and snake bites. Thus, you are fully convinced that these are dangerous things, so you avoid them. But any one ignorant from these facts, He will not be afraid, like children etc. In the same way, the relationship of the majority of people with God is only to the extent of familiarity with His name. They are not sure about it. That's why we don't submit to Allah, we don't live according to His instructions, we don't make it our top priority!

2. A Matter of Believing and not Believing

Before the study, it should also be kept in mind that the matter of accepting or not accepting the reality is that: For the one who want to accept the matter, even a half-firm argument is sufficient for it and for the one who has decided to deny the truth, even if a thousand proofs are presented, he

will continue to interpret them wrongly. In this writing, you will find innumerable sure and clear proofs, out of which even any one proof will be enough for faith in God. May Allah grant us the ability to understand and accept the truth with good nature. (Ameen)

3. Sources of Faith in God (Allah)

The first thing to know is that if someone decides to believe in God, then what are the sources? That is, what are the things, what are the arguments that can be a source of faith in Allah? So, as a result of a lifetime of thinking, we came up with the following sources:

- a) **Birth Reason:** It means that a person is fortunately born into a family that acknowledges the existence of God. But this faith can become useful only when a person acquires a firm and conscious faith through the process of deep thinking.
- b) **Conscious Causes:** The Creator has created man on the basis of good nature and has deposited his identity within every human being. Now man was born anywhere, but if he did not negate his intellect, insight and consciousness, don't kill his conscience. Such a fortunate person does not abandon the great path of thinking, so the God will bring him to the truth very soon. Allah has placed such clear and concrete signs in the universe. It is not difficult for people of intellect to reach God.
- c) **Miraculous Support:** Although we have been created here free, we have been given the freedom to choose any path

between good and evil. But since our body, heart and mind are directly under the control and power of the Creator. So He can miraculously create the insight and desire of faith and belief in heart and mind of chosen people. So this case is usually specific with the Prophets (peace be upon them), but there is a possibility for non-prophets also in certain exceptional circumstances.

However, the real good fortune is only for the people of wisdom and knowledge, who have not stopped using the great wealth of guidance, i.e. "Intellect and insight". Allah guides such lucky people to the real truth, it comes, no matter where they are born. For such thinkers, the countless signs of "Allah" in the universe become a solid means of taking such lucky ones to the Creator. By the way, everything in the universe is a sign of Allah, however, in this regard; clear signs will be described in this book under the following topics which are a sure means of reaching to Allah:

- (1). Human existence is a great sign of Allah
- (2). Allah's signs in the universe
- (3). Prophets (PBUH), a great sign of Allah
- (4). The definitive arguments in the divine book and modern science
- (5). Amazing predictions of the Holy Quran
- (6). Signs beyond physical laws of nature

Each of these topics is enough to believe in Allah to the extent of certainty, provided that there is no malice in a person!

In this regard, before going into detail, understand a scientific law, "law of Entropy", which is a very clear argument for the existence of Creator.

Law of Entropy

To understand this law, we take help from a common sense example. For example, let in a tray some balls are white, some red, some blue, some black etc. if you start to mix, the more you shake, the more they will mix up together and it is not possible for each color ball to return to its original state separately by continuing to shake i.e. their Entropy is increasing. It is a law of nature that entropy is always either continuously increasing or at least remains constant i.e. it remains in a certain state. It does not decrease automatically i.e. it cannot be reversed. An external force should intervene, i.e. put a hand from the outside and pick the balls of different colors and keep them separately.

Now, keeping this confirmed fact in front of you, consider the universe, and then you will automatically reach your God. Is there no need for the intervention of an external infinite power in order for human beings and other creatures and commodities to be regulated and for the universe to run in an orderly manner?

Without this ultimate external power (Creator), the imbalance in everything, including the universe, would have increased

with time and eventually this system would have been collapsed.

After having this basic input, now we unfold the signs under mentioned topics very briefly.

Chapter-2

(1). Human Existence is a Great Sign of Creator

A Human, who is generally oblivious to his creator and himself, is a great sign of “Allah Almighty” himself. In the Holy Quran, Allah Almighty has called the creation of man as His sign and invited him to think about himself so that by seeing the many signs of God within himself, he becomes the one who recognizes his Creator by recognizing his own self. God said:

“And for those who believe, there are many signs in the earth and in your own self, so don't you see?”

(Al-Zariyat: 51: 20-21)

In another place he said:

"Indeed, there are many signs in the heavens and the earth for those who believe, and in your own birth and in the birth of the living beings whom He spreads, there are many signs for those who believe”.

(Al-Jathiyah: 45: 3-4)

Let's respond to this invitation of the Craetor and think about ourselves and look for the signs of God within ourselves so that we can recognize the great Creator hidden in the veils of the unseen and we can walk on the path of his purpose. There

is a famous saying: "Whoever knows himself knows his Creator". Let us think on ourself, that how we are sign of Creator!

Highly considerable! The first basic question arises in the mind of a wise man after attaining consciousness is that; where does my existence come from? Man is making things from the simplest to the most complex, in which no rational person is willing to accept the spontaneous creation of even a very simple object down to a piece of paper. But when we look at our body, we are deceived that it did not need a creator to be made?

Let it be assumed that the material from which our body is made was already present in the mother's womb, and it automatically converted into hands, fingers, arms, neck, bones, eyes, feet, legs, jaws.....etc. and appeared in the desired form of our body without any intervention or the designer. Is this possible? Is any wise person can admit it?. Suppose the substance in the womb of a single mother transformed itself into our body (which is impossible), then what is the justification for the millions of human beings who came into the world and are continuously coming? How can we justify it that they are being produced himself? Through which rule we can defend it?

Just think! Think of a car, motorcycle or ship engine, how the designer has taken care of all the basic requirements?. How complex the system of pipes/wiring is? The delivery routes and systems of the things that need to reach where they are,

then the systems for the disposal of spares and waste products...etc. If they are automatically created without being created, then can any wise person admit it.....?

So just think about your body structure: The pipes and system for chewing food and taking it to the stomach, the very complex system for the absorption of essential components from the stomach into the blood, the system for the elimination of waste food in the form of feces, the toxins from the blood. The kidney system for excreting substances, then the pipes and systems for excreting these toxins in the form of urine, the very complex system of vessels for the delivery of clean blood from the heart to the whole body with high speed and pressure, then the return of dirty blood system, the electrical system of conveying messages from the brain to each organ.....didn't a designer need to do all this.. ..? Is it all automatic? Are these human systems inferior as compared to the engine of a car that no designer is needed for it....? If someone says that there is no need, then there is no lie bigger than this in the universe!

These facts can be ignored, but a Creator with unlimited power cannot be denied for a conscious, intelligent & fair human being. Before denying Allah, one must deny one's own existence.

It is surprising to man that he acknowledges his own existence but denies his m

Maker. Is the denial is simply because we do not see anyone who made us.....? The creator has asked the man:

"We have created you all, then why do you not confirm (this fact)?" (Al-Waqa'ah: 56:57)

The above explanation is enough to bring complete faith in God, but let us give some more details to the above question so that the truth can be revealed.

Stages of Creation of Human

After realizing the fact about ourselves that we are made of a very small and insignificant amount of matter. Now let's get a very brief awareness of the various stages of our creation so that we can be aware of our reality and be grateful to our Creator who gave us existence from something unmentionable and made us a complete human being from a nothing (just a micro particle).

The process of cell division begins in the human seed zygote, one to two cells, two to four and then four to eight cells. Three days after mating, through this division, a solid ball of 12 to 16 cells is formed, which is called Morula. This slips through the fallopian tube and enters the uterus. On the fourth day, the merula changes into a new thing called a Blastocyst, which undergoes various changes and finds a very safe and suitable place to live in the uterus and sticks to the wall of the uterus. It is so that it can build its abode there and get its food from the womb wall. After a few days we find a very safe and suitable place in the uterus and stick to the uterine wall. O man, is this great thing happening to you himself?

After about 20 days, we change into an animal-like state (the shape of a leech) for which the term "Alqa" is described in the Holy Quran. After the third week, the brain, heart, spinal cord

and circulatory system begin to form. Thus, usually on the 23rd day, our condition becomes like a soft chewed object (chewing gum in the teeth). This condition has been described in the Holy Quran as "Muzgha". In the fourth week, the process of bone formation begins, due to which the erection of the body occurs. This stage is called "Uzama" in the Quranic term.

After that, the muscular (meat) patties begin to wrap in a specific way, which completes the embryonic period. The various stages of our creation have been mentioned by our Creator as follows:

"Then We made the sperm (drop) into an Alqa (leech-like structure), then we made the Alqa into a Muzgha, then we created bones in it, then we covered the bones with flesh, then we made it appear as another kind of creature. So how blessed is God, who is the best Creator among creators." (Al-Mominoon: 23: 14.12)

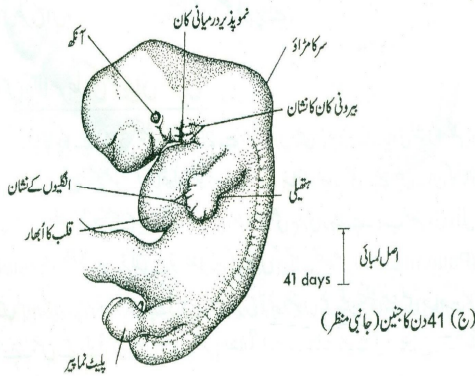

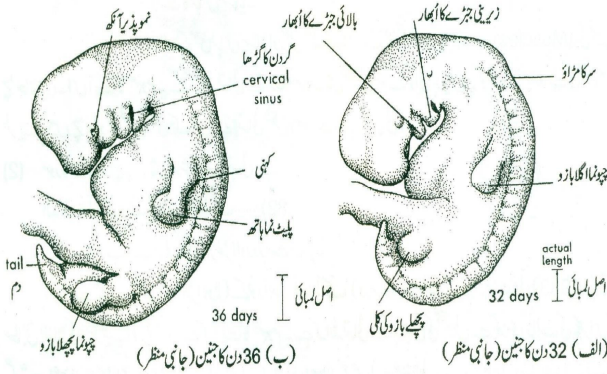

Note: The review of the objections of non-religionists on the above verse has been presented at the end of the book as Appendix.

Our creation can be divided into two basic periods:

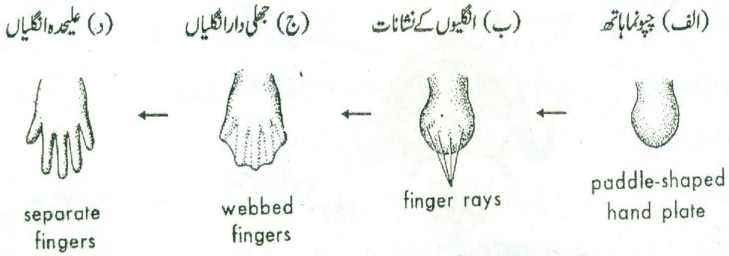

(1). Genetic Period (Embryonic Period): This period is completed in five or six weeks. Except the reproductive organs, the rest of the important organs grow in it.

(2). Fetal Period (Fetal Period): This period starts from the 9th week and the human edifice which was laid in the genetic period begins to be completed in this period. Through revolutionary changes, human personality is highlighted. The

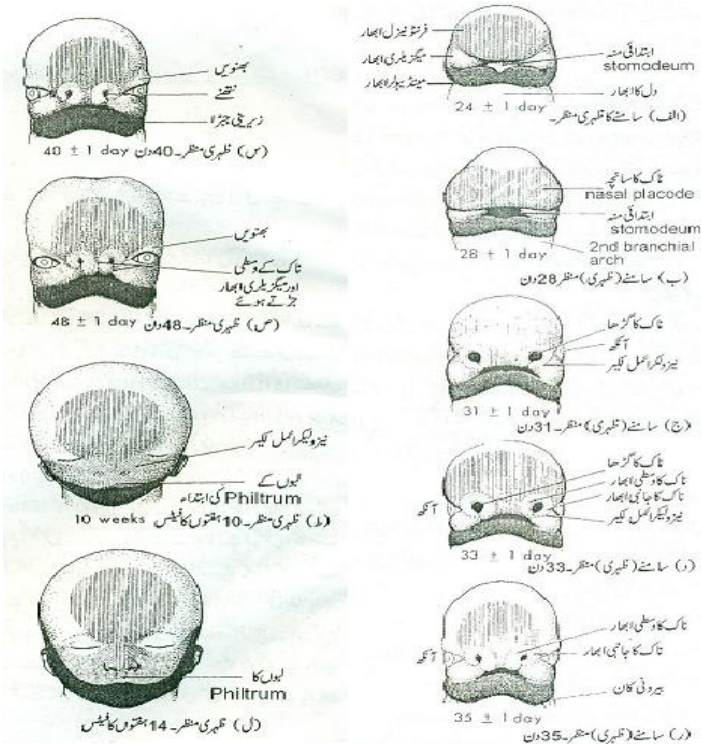

powers of seeing, hearing, feeling, tasting and understanding are combined and in 9 months our body become the miracle from a particle and come to the world. Thus, an insignificant drop is transformed into a new form. This final stage is described in the Quran as "Inshah". Consider the following pictures and learn how the Creator takes us through the various stages of creation:

How our hands come to their original condition, see and believe in your Creator:

How our face is formed, see and take a lesson:

What were we! After 20 days in the womb we were only 3 mm, then after 30 days our length was 7 mm, after 40 days we were 11 mm, after 50 days we were 22 mm, after 60 days we were 50 mm. Months later, God made us 19 cm and finally, after 9 months, we came into the world with a size of about 36 cm. Is it wise to forget the One Who made us a complete human being from nothing (just from a micro particle)?

After realizing the fact that we are made from a seed which is so small that our eyes cannot even see it, we are then given various very precious organs: heart, brain, liver, kidney, eyes, ears, tongue, teeth, hands, feet, digestive system, urinary system, reproductive system... need to be thought about how well they are designed and how well they are designed according to their intended functions. The wisdom contained in them, In the face of design and innumerable facts, only the unfair can deny the Creator! For intellectuals, every organ is a very clear proof of access to the Creator.

For the sake of brevity, the astonishing description of these organs is not presented in this booklet. However it is covered in our some other book.

Some Undeniable Evidences

As we know, there are countless clear signs of Allah at every (Macro & Micro) level in our existence. And if we look deeply at the human existence at the (Micro) level, it is impossible to cover the signs of Allah present in it. However, here we point out a few signs at the (Macro) level which are undeniable evidence of the existence of the Creator:

- 1) Our heart, which is very delicate, has been placed with great safety inside the strong chest bone cage, because life depends on it. It has been placed in such a place where it can be fully protected. Whether a person runs, lies, falls, or gets injured, the effects of these accidents do not easily reach the heart. Didn't someone plan to keep it in such a safe place? Do we have any role in keeping it in the desired safe place? If it had not been kept in such a safe place, we would have lost our lives very soon after being born.!
- 2) Similarly, our brain is also very delicate like the heart. To protect it from external accidents by placing it in the desired place, a very strong shell (Skull) has been designed around it. If this strong shell were not around the brain, we would have survived only a few days. Who has planned all this? Did we decide this inside the mother's womb? Or our parents? Oh!, even after seeing such clear signs, man is oblivious to his Creator!
- 3) Instead of going into the details of the eyes, just ask yourself this question: is there such a complex thing

inside human flesh that is completely different from ordinary flesh, which has a glass-like lens, whose pupils open and close automatically, a special type of fluid is produced for the movement of the pupils so that the pupils can avoid friction, if this fluid is released in large quantities, water will always flow from the eye and we have to clean it all the time, and if it is released in less quantity than required, your pupils cannot move and the eye becomes stiff. Then, considering the fragility of the eyes, Creator placed them in a safe place in the bone sockets so that they could be saved from being lost in case of injury. Who has taken care of all these matters?

- 4) The respiratory tract is such a clear sign of Creator that completely eliminating doubt, immediately leads the people of insight to the Creator. Since a continuous supply of air is absolutely essential for our life, this tract should have been so hard that its walls could not close the airway together. If it were made of a material as hard as iron to fulfill this basic need, our neck would have remained straight and stiff, we could not turn it right, left, up and down. And if it were made soft to fulfill this need, this tract would have closed while turning the neck. Thus, our life would have ended. May Allah Almighty be praised for the excellent craftsmanship who designed the respiratory tract so skillfully that both the above-mentioned needs could be fulfilled. The flexible cartilage pieces were connected to the flesh so that the neck could

move easily and a material was used that even if it was closed due to flexibility, it would open automatically.

Moreover, life ends as soon as breathing stops. Therefore, a fool-proof redundant system was created for taking in breath so that the delivery of breath could stop even for a moment, that is, the mouth and nose (whose openings) remain open all the time.

Dear friends! Even after seeing such clear signs, is there any room for doubt in Allah Almighty? Is there any human intervention in making this respiratory tract? If we had to breathe on our own, we might not be able to live more than a day. Shouldn't we be obedient and grateful to Allah for giving us such great blessings?

- 5) Our teeth are a great favor from Allah Almighty. They are extracted from flesh. The white color of the teeth was the most suitable for the face. If it were any other color than white, such as red or black, people would be afraid of it. There are many signs of Allah Almighty in the teeth. The teeth growing out of the jaws and then stopping at a certain length is a sign of the God. If they continued to grow, our lives would have become a torment. Have we stopped them? Then consider their structure, to eat anything, it was necessary to bite first. Allah Almighty made the front teeth sharp and pointed so that we could cut the food easily and the back teeth wide so that the food could be ground. Did we do all this with our own free will? No, our teeth are enough to reach the Creator, which are announcing the craftsmanship of our Creator

with our tongues. We must remember our Creator while taking advantage of these teeth and thank Him. Has the flesh of the mouth automatically turned into teeth? Consider the material of the teeth: if it were soft, it would not be able to chew the food and if it were hard like iron, it would cut our tongue. The Creator has chosen the material that is most suitable for the aforementioned task. For those having wisdom, teeth are very clear signs of nature.

- 6) Moreover, male and female are created as two separate species. Both of them together make the wheel of life work. Both are given separate systems compatible with each other to fulfill each other needs including reproduction. Who has planned to do all this in two different bodies? Is this all by chance? Or by self? Think on it!

Is it possible for any wise person to deny the above undeniable facts of the Creator's craftsmanship? Not at all! So protect yourself by immediately believing on Him.

Chapter-3

(2). Allah's Signs In the Universe

The Main Question? The basic question that arises regarding the signs of Allah Almighty in the universe is that some tasks in the universe are the responsibility of man, such as plowing the land, sowing seeds, watering, cutting crops, kneading dough, building houses, making tools, etc. We are well aware that such things do not happen automatically, rather they have to be done. For example, if someone says that in the United States, iron ore scraps were collected by air scraping, which automatically made airplane (Boeing). No human being in the world will accept it, rather people will say that he has lost his mind. Or if someone says that such and such a house or plaza has been built automatically, will this be accepted? Even the smallest object, paper, pencil, etc. No one will accept its automatic formation because we have never seen these things being formed automatically.

Attention! Is it the birth of man, the growth of trees, the ripening of delicious fruits on them, the birth of beautiful flowers, the birth of different types of animals, the rising and setting of the sun and the moon at fixed times, the day and night coming and going, etc., Are these works are more despicable than paper and pen etc.? about which we say that these are natural factors that happen spontaneously. If we

think on these facts, we will surely reach the Creator of these things. That is why the Creator of the universe has invited human beings to think on the universe, He said:

"Surely there are signs for the wise in the creation of the heavens and the earth and in the interchanging of night and day. Those who remember Allah in standing, sitting and lying on their knees, and think on the birth of heavens and the earth. They say "O our Lord, You have not made all this in vain, You are pure, so save us from the punishment of the fire" (Al-e-Imran: 3: 191-190)

Let come to see a few more signs out of the countless signs of Allah in the universe. Responding to this call of Allah, meditate on some aspects of a few things in order to reach your Creator.

The Great Proof of The Existence of God: The great proof of the existence of Allah (SWT) is His creation which we observe. The entire universe is a creature, that is, it is a creation, not a creator. If we accept the universe as a creature, then we must also accept its Creator. Acknowledging the creature is testifying to its existence, but not acknowledging the Creator is completely meaningless, as if denying the existence of the Creator is actually denying the existence of the creature. For example, one may recognize the presence of the "Burj Khalifa" in Dubai, but not recognize its architect and say that it was formed automatically on such and such a date. Will people accept this? If not at all, then there is no other explanation possible for the existence of the universe, the

order in it and its meaning, except that it was created by someone, whose power is unlimited, which is beyond the imagination of human.

Introduction to the Universe

Now we review the universe and some of its creatures with a brief review of some of its important aspects so that we can recognize our Lord and become obedient to Him.

Origin of the Universe

Regarding the origin of the universe, it is estimated that about 13.7 billion years ago, an extraordinary explosion (Big Bang) took place, as a result of which a large number of galaxies came into being. The discovery of this “Big Bang” began in 1929 with the American scientist named Hubble, who saw through the telescope that the galaxies were moving away from each other. Then in 1960, Robert Wilson confirmed this theory with specific radiation (Microwave Background), after which it was confirmed twice by different sources in 1990. Cosmologists say that when time had not yet begun (At $t=0$). At that time the entire universe was like a small mathematical point with zero volume but infinite density. After the explosion, as the time increased ($t=0,1,2,3,4,5,6\dots$ sec), this point expanded, which eventually gave rise to the entire universe. In this way, it seems that the universe has been created from nothing. According to scientific principles, after the explosion, countless planets should have collided and ended because the result of explosions is destruction and not order and organization. . But

the fact that this did not happen is a proof that some unlimited external force was acting on them which did not allow it to happen. The question arises as to how such a great event based on purpose and meaning and wisdom, which caused the creation of the universe, has happened automatically without anyone doing it?.

Size of the Universe

This universe in which we are spending the days and nights of our lives, the extent of which has been estimated by the study of astronomy, amazes the human being. According to the estimation of astronomers, more than 300 billion galaxies have been estimated in the visible part of the universe, while the visible universe is a smaller part of the overall universe. This galaxy is not just a shining star in the sky, but the galaxy itself is so big that it is estimated to have more than 250 billion stars. Astronomers have described it as an example to make it more understandable that there are as many grains of sand on the shores of all the oceans in the world as there are probably the same numbers of stars in the sky.

These are not flashing points! The twinkling stars seen in the night are not points of light or hanging lanterns (as earlier people thought) but they are huge in size. Some of them are the same size as the sun, some are bigger and some are smaller. Some are so big that millions of earths can be placed inside them. Like our sun, this is 1.3 million times bigger than the earth. The Universe and our Earth have countless "Fine Tunings" in which even a small change can destroy the whole

Universe and the life on it like; forces in atoms, mutual attraction between planets, distance between earth and sun, angle of earth with sun, ratio of gases etc.

Mutual Distances: The mutual distances of these stars are so large that the human mind keeps thinking in wonder and worry. The closest to Earth is the Moon, which is 240,000 miles from Earth. (The sun itself is so big that its size (diameter) is 8,65,000 miles, yes it is!), some of them are thousands and millions of light years apart, which is incomprehensible. Our own galaxy, which we see at night as the Milky Way, is one hundred thousand light-years across. Remember that a light year means light that moves at 300,000 kilometers per second, the distance it will cover in one year will be one light year which is equal to 10 trillion kilometers (1.0 light year = 10 trillion km). Then this galaxy is part of another large galaxy cluster with 17 similar ones. The galaxies are moving and the entire cluster is more than 20 million light years in size (diameter).

Motion in Orbits: Then these stars and planets are not stationary but are continuously rotating around their axis and around other stars in specific orbits with their own systems. Their movements are surprisingly organized and regular. During the movement, sometimes one galaxy passes inside another galaxy, even though the stars do not collide with each other. For example, our alternating days and nights are due to the movement of the Earth, the rotation of the Moon creates the lunar months. All these things are running according to a specific schedule. The rising and setting times of the sun are

the same on a particular day in say June of thousands of years ago and on the same day in June today. Is their movement and the amazing discipline found in them is not it giving an indication that there is an unlimited power behind them?. Can this all happen automatically? We are not ready to accept the automatic creation of a paper and pencil, then why do we cheated here? No sensible person can imagine that all this is happening automatically. The One who made them and bound their movements, says in the Holy Quran:

“And He has bound for you the night and the day, and the sun and the moon, and the other stars are also bound by His command. Indeed, there are many signs in it for those who act wisely”. (Nahl:16:12)

The creation of such a large universe, its continued existence while moving, and its permanence is a clear proof that it was created by a Creator whose capabilities are beyond the imagination of human being. Thus, the creation of this universe and its permanence is a great sign of the Great Creator, which was announced by the Holy Quran as follows:

“It is certain that Allah alone holds the heavens and the earth so that they do not slip from their present state, and if they leave their present state, then no one can hold them except alone Allah. Surely He is very gentle and forgiving”. (Fatir: 35:41)

At another place, he described this fact as follows:

“And among His signs is (this fact) that the heavens and the earth are established by His command, then when He calls you, all of you will come out of the earth”.

(Room: 25:30)

Let us be proud of the fact that we are believers in such a great Creator who is the Creator and owner of the vast universe and its Guardian. On being aware of these facts, make a commitment to the presence of Lord with your heart and soul, adopt his path and decide to live your life in obedience to him. May Allah grant everyone the opportunity to act on it. (Ameen).

Very Small Worlds-Great Sign of Allah

The discipline that is seen in big worlds is also present in very small worlds. Matter is made up of tiny particles that we call 'Atoms'. The atom is so small that millions of atoms come on the tip of a needle and still man has not been able to see it even with the help of powerful instruments. It is said to be the smallest world. Visually, it is a single body, but surprisingly, like our solar system, it has a very complex circulation system. The electrons found in it move around the center in specific orbits. Despite being so small, if the atom is taken on a large scale, a significant distance is seen between the electron and the nucleus. Apart from protons and neutrons, many other particles have been discovered inside the nucleus, which are not bound together, but far apart. If there is a disturbance in the integrated system found in the atom, the electrons fall into the nucleus, then the entire

universe will be collapsed due to the destruction of each atom.

Surprising: Who made things on such an extremely small scale and made particles move and operate them in coherent systems? Has this been done by man who has not yet been able to see the atomic system of this structure? Contemplating the atom makes one wonder that, Who is that Which is controlling even the smallest particles of the entire universe all the time?

Plants are a Great Sign of Allah

Plants are a very big and clear sign among the countless signs of Allah in this vast universe, which Allah Almighty has explained in many places as a proof. As in one place, He called us for contemplation.

"From it (the rainwater) He brings forth for you crops and olives and dates and grapes and all kinds of fruits. Of course, therein is a great sign for those who are thinker." (Al-Nahl. 16: 11)

Since Allah has declared plants as His sign and invited for contemplation, therefore plants are not a trivial thing as we generally think. Let us consider some aspects of it.

An Example: To reach the Creator through plants from contemplation, first understand a basic law and rule with a common sense example. Like we see that, after passing through the machines, the sugarcane juice is converted into sugar, etc. It is expressed in the following form.

That is, something entered into the machine, such as sugarcane, the machine performs some action on it and it converts it into an output, such as juice. With this principle in mind, we think about trees. In the process of plant growth:

Input = Soil, water, air, light and fertilizer etc.

Output = Plants (Wood, Leaves, Fruits, Flowers, Seeds)

Let us think about the output:

- i. Consider plant wood. Some giant plants have tons of wood, with trunk diameters in meters. This material of wood was neither in the ground, nor in the air, nor does the earth's soil change into wood, because if the plants ate the soil, the earth would have been exhausted, then where did the wood come from?
- ii. The composition of the leaves, their green material, the color of the leaves, the many different designs of the leaves, and then the same appearance of all the leaves of a plant, then the material of the leaves, flowers etc. is such that it can easily be decomposed & becomes part of the earth and ultimately vanishes over the time. If it was not like this and the leaves had continued to exist,

the whole world would have been drowned in leaves by now. Are all these things done automatically without anyone designing them?

- iii. Consider flowers produced from soil. Their beautiful variety of colors like white, red, blue, yellow, pink, sky blue, yellow.... then the multi-colored designs in each leaf, the wonderful arrangement of the petals in the flowers, then the fragrance of the flowers, where does it come from? Is it in the soil or space? Are they automatically being created?
- iv. The emergence of new branches and new leaves on regular fashion at equal distances on the branches of the tree as if someone had measured them carefully with a scale. Isn't that enough proof that someone designed them?
- v. The growth of the leaves, fruits and shoots of each tree to a certain size according to its own design, is it not a clear proof that they were fully informed by designer otherwise the size of the leaves and fruits would have continued to grow. The next question is who is the one whose instructions even the plants understand? Have we told these instructions to plants?
- vi. Think about the shape of the fruits. According to the need, the outer covering (peel) of the fruit has been applied, orange peel according to its need, watermelon according to it, banana, apple, pear, walnut, almond, etc. Then consider the substance of the fruit, what has been transformed into the fruit. Look at the flavors of

the fruits, banana, apple, pomegranate, watermelon, how delicious the mango is, think about the yellow color of their pulp and the aroma. Then bitter chillies are coming out of the same ground, sweet mangoes are coming out of the same place. Aren't these all great signs of Almighty Allah's power?

- vii. Does not the presence of hard seeds in the soft pulp of the fruit also tell us about the Creator?
- viii. Fruits grown on plants like wheat, rice, vegetables, fruits, etc. have they accidentally become compatible with our body?
- ix. The branches and twigs are strengthened according to the weight of the leaves and fruits, the twig is thick in the beginning and becomes thinner as it goes on to support its own weight and the weight of the leaves. Does the substance coming out of the tree automatically change into this form? Have we ever thought while eating various fruits, who made them for us, and thanked Him while eating the fruits? Inside each leaf are huge structures that convert light into matter in the presence of air, water, and soil to make food.
- x. Leaves have amazing ability to withstand environmental conditions. While designing them, special care has been taken to ensure that rainwater falls on the ground instead of accumulating on them. Especially, if the water gets on the large leaves, then a single rain would cause all the leaves to damage, due to which we would lose many trees. Similarly, their structure is designed to

withstand the flow of air. The leaves and fruits of the plants in the desert region are adapted to this harsh climate to withstand the scarcity of water. In the environment in which these leaves had to open their eyes, surprisingly, the abilities according to this environment were to be created in them? Have we conveyed such important information to the plants or are the plants aware of the external environment by itself? Will we not recognize our Creator even after seeing such clear facts?

- xi. Overall, each plant has been given a distinct shape, when seen from a distance; it can be guessed that this plant is of mango, orange or apple etc.

A Sure Conclusion: Thinking about these few marco-level aspects about plants leads to a sure conclusion that they are designed by someone. The fact that things of a particular design come out of a factory in batches does not mean that things are being made automatically. Botanists have also discovered that seeds contain enough data to fill millions of pages. A lot of information in the seed; size of plant, its height, thickness, quantity of leaves, their formation, place of branches, clours, smell and including the details of the fruit... is it automatically written in the seed?

If someone says that sugarcane juice is automatically converted into sugar, then we should not accept this simple argument, but do not pay attention to the formation of plants with the above-mentioned undeniable facts. If we think that this is happening by self, then we invite the whole world to

make a grain of wheat or any other seed that can grow, if they cannot do that, then believe in the Creator who has produced abundant fruits of various kinds. On mentioning this great blessing and sign of his, God said:

“And it is He (Allah) who sent down water from the sky, then We produced all kinds of plants to grow through it, then We created from it verdant fields, We took out from it the seeds layer by layer and the date palm. From the tree his bunches of fruit bowed down, and gardens of grapes and olives and pomegranates, similar to each other and different in characteristics. Look closely at its fruit when it bears fruit and its state of ripeness (i.e. how the unripe bitter fruit turns into sweet taste). Indeed, in these things are many signs for those who believe”. (Inaam: 6:99)

In the aforesaid verse, the Creator has explained many things for the wise one. Can all jinns and humans combine to produce a seed from which a plant can grow? If they can't, then accept that these things are created by a super being whose name is Allah (SWT).

A Lesson for us in Milk

In the Holy Quran, while mentioning the blessing of milk, Allah has used the word of 'lesson' for people instead of a 'sign', which indicates that the creation of milk is a very unusual thing and this is a great proof of the Creator's creativity. It is something that needs to be thought about. Allah says:

"And surely there is a lesson for you in the cattle and We feed you what is in their belly from dung and blood, taking pure milk out of them, which tastes very pleasing to those who drink it." (Al-Nahl: 16: 66)

Considerable: To understand this verse, keep in mind the example given in the context of plants, that milk is an output, buffalo is a machine and input is green fodder, other food and water then think that:

1. Can desired milk be produced from grass and water?
2. When the fodder, blood, meat, dung and water etc. in the buffalo's body is converted into milk, how does this blood, meat and dung etc. turn into milk?
3. What are the rare filters that separate the milk in such a way that there are no particles of blood, meat, dung etc. remains in the milk?
4. Doesn't the delicious taste and full white milk obtained from red blood, flesh and black dung indicate the presence of its Creator?

Let's while benefiting this great blessing and sign of Allah day and night, remember Him, Who created milk in the bodies of animals for our benefit.

Egg is a Clear Sign of God

Thus, whatever you think about, it leads to the Creator of the universe, but the 'Egg' is one of the few signs that are clear signs of the Creator. The eggs that we eat day and night and consider as a trivial thing, think about that:

- 1) How did the blood and meat in the hen's belly turn into an egg? Did the meat and blood automatically turn into an egg?
- 2) Consider the joint-less hard outer shell of the egg, its shape, its uniform thickness, then it may not be easy to make it even in modern machines, but it is definitely impossible, because even if the outer shape is made, then how will you empty it from the inside without joint?
- 3) Consider the white color of the outer shell, its material and the extremely thin and strong membrane after the shell. How did it become inside the closed shell? Surely not all creatures can do this!
- 4) Then see the material inside the egg, where did it come from? If its details are explained, the books will be filled.

The Hatching of Chick from Egg: Let's say that we consider the egg to be a small thing, but becoming a chick from this egg is not a trivial task. Consider that the substance in the egg that we eat has changed into a complete chick after staying under the hen for a few days:

1. Is the chick's beak was present in the egg water? Where did it come from? Has the egg material himself become a beak?
2. The highly complex eyes of the chick, which have the ability to see, the lens of the eye and other eye systems were all these present in this water?.
3. The chick's nose, ears, heart, brain, stomach, liver, intestines and other highly advanced and complex

systems were present in the egg water? How did they form automatically? Can we make these things out of this water?

4. Where did the beautiful colored cotton wool on the chick's flesh come from? Who has made the chick's legs, feet, nails, etc. Then this chick is not a lifeless model! It sees, hears, feels, walks, smells and has the breeding ability for new generation. Can all jinns and human beings work together? Even if it is not a whole chick, any organ should be made from egg water like; eyes, beak, ears, heart, stomach hair, etc. Is it fair to say that it has been done automatically for the work that is beyond our capacity?

Capabilities According to the Environment

Granting the body and other capabilities according to the environment in which the living being had to spend his life. The fish had to live in the water, gave it a flesh that could not rot in the water. The empty space in the stomach was kept, the ratio of density in the body was optimized so that the fish does not drown in the water. Put wings to swim in the water to move around in his world. On the contrary, He gave the man who lives on land such meat that can sustain on land, if this meat is put in water, it will rot after a day, while the meat of fish will harden on land, and if man goes into water, he will not breathe and the fish cannot breathe on land!

Animals living in snowy regions were given long hair with a thick layer and suitable skin to protect them from the cold.

Baby animals initially have no one to take care of them, so they start walking as soon as they born. Man was given wisdom and consciousness, he was given a house, he was given possession of things, he could take care of children. That's why their baby takes a long time to walk. Such innumerable facts themselves confirm that there is an unlimited mind behind making them.

Similarly, he gave the system of eating and digesting food according to the food of the animal. The fine teeth of fish are suitable for their food, the teeth of elephants, lions, tigers, buffaloes, cows, and goats are suitable for them. He made beaks of birds according to their needs. Man had to eat everything, his teeth are designed suitable for his need. If only the mouths of the animals were made wrong, which were not suitable for the required food, then the life of all the animals would have ended in a few days. It is surprising that we believe these modern systems but remain oblivious to the Creator of these systems. Is it not possible to deny these systems simply because we see them with our own eyes while the Creator is not visible to us, but there are many other things that we do not see while we acknowledge their existence and their consequences? like air is not visible but still we acknowledge its existence, electron, proton, neutron, atom no one has seen but we firmly believe in their existence. Allah's signs are much clear and bigger than them but we do not think on it. If justice is done, then no obstacle can keep us from believing in our Creator.

Bodies according to the Work: The body and organs are given according to the work for which the animal was created. Give the body to the; horse, the donkey & mule according to its function, hard and lifeless hooves to walk and run on the ground, the body of the cow, buffalo, goat, sheep, according to its function. To support the heavy and light weight of the elephant, a special type of spring-like system was placed in his legs so that when he hits the ground, he gets the least shock. If this were not the case, the feet of the elephant would have sunk into the ground and it would have suffered a severe shock on the hard ground and it would have been difficult for it to walk. If a person does not recognize his Creator even after seeing such great signs, then surely this is a great misfortune for him. Allah has invoked the man in this way by making animals as signs and proofs, He said:

"He created cattle in which you have warm clothing and many other benefits, and some of them you eat, and in them you are proud when you graze and bring them to graze, and they carry your burden in those cities to where you cannot reach without labor. Surely, your Lord is most compassionate and merciful, He created horses, mules, and donkeys for you to ride on and for adornment. And He creates (many other) things that you do not know."

(Al-Nahl: 16: 8-5)

Note: Even in today's modern era, where vehicles etc. cannot reach, animals are used to reach on mountains etc. Who is the one Who made the minds of these animals by issuing

commands to obey us? If the nature of buffalo, cow, goat etc. were like lion, leopard, then it would be difficult for us to save life instead of taking advantage from them. Then finally, there is someone who has controlled their minds. The camel has been specially declared as a sign by Allah.

"Didn't they see the camels in what manner they were created?" (Ghashiya: 88:17)

The camel is very different from other animals. His body, appearance, design is according to his work (to carry the load), wide and flat feet suitable for walking in the desert. If these feet were like other animals, the camel could not walk in the desert. Then, since water is difficult to find in the desert, God has made a tank to store water in his belly. Then look at the nobleness of the camel, how he has made it a good soul. O man! are these arguments not enough for the recognition of the Lord? Then why does you not obey your Lord? What is the thing that has made us careless?

Flying Birds are Sign of God

Swimming of fish in the water, animals walking on the ground, birds flying in the air, these are all signs of God. The flight of birds is specifically mentioned by Allah (SWT) as follows:

"Have they not seen the birds, (how) they flying submissive, (in the sky) they are not held by anyone except Allah. Indeed, in them are many signs for those who believe." (Al-Nahl, 16:79)

He further said:

"Have they not seen the birds flying above them, wings spread and sometimes folded? No one is holding them in air except the most merciful, surely He is all-seeing"

(Mulk:67 :19)

If we consider this sign, some important things come to light:

1. In flight, birds retract their legs immediately, just as the wheels of a plane go in. Who taught birds to do this?
2. While flying, if the balance is not maintained just for a moment, then the birds will immediately fall down, just like sometimes people fall while standing due to the loss of balance. Who is constantly maintaining this balance?
3. Who teaches them the specific movement of wings to fly?
4. Recognition of territory and place in flight: Returning to the nest from a distance is evidence that someone has given them sense. For example, in his book "Power and Fragility", Professor Hamergar has given the example of a bird called "Mutton" which is found in the Pacific Ocean. While migrating, this bird covers a long distance of 24,000 km in a circle of 8 and completes its journey in 6 months and returns to its starting point with a maximum delay of one week, which is a clear proof that there is someone guiding him.
5. How many birds and insects are flying all over the world at all times? He holds all of them at all times and takes

care of each and every one of them. How great is our Lord. Just we need to think on these undeniable facts!

An Irrefutable Proof of the Existence of Creator

Humans use hard shoes made of leather etc. for walking in order to avoid injury to the feet. The question arises as to whether the flesh of the ends of the legs of animals for which it was not possible to wear shoes is the most suitable hard inanimate material. How has the flesh automatically changed into hooves like of; lion, leopard, goat, cow, buffalo, horse, donkey etc. as per requirement, who has decided to turn the meat into hooves inside the animal's body? Is it the decision of flesh or the animal that has to be born? Or the animal's parents decided it? The animal is not even aware of the external environment and what it needs in the outer environment. Even after seeing such clear signs, do we remain oblivious to the Creator and still deny Him?

Chapter-4

(3). Prophets (PBUH)-a Great Sign of Creator

Prophets (Peace be upon him) the Messengers of Creator are such a clear sign of God on this earth that it is impossible to ignore this fact. Regarding the Prophets (PBUH), some aspects based on certain authenticity are presented here for consideration so that the truth becomes clear.

a) All the Prophets Having Noble Character

Allah sent Prophets and Messengers in large numbers (thousands) to guide the people. History is also a witness and it has been proven time and time again that no matter how bad the society in which these chosen People grew up, the qualities of these special people always remain noble. Their foot was always clean from the evils in the society; they were free from deadly diseases like envy, malice, lies, deceit, cheating and breach of promise etc. As an argument, for the sake of brevity, we present a few things about our beloved Prophet, Hazrat Muhammad (PBUH) as an argument.

- i. The entire period of 40 years before the announcement of prophecy was so morally honorable that people started calling him Al-Sadiq-Al-Amin

(Truthful and Honest) and 'Al-Sadiq Al-Amin' became the famous title of the Prophet (PBUH). So when he was chosen after the decision of the dispute over the installation of the Black Stone (Hajr-e-Aswad) in Qibla, the people said: This is Ameen (trustworthy), we all agree on His decision.

- ii. After the declaration of prophethood, when the Prophet (PBUH) invited the people gathered at the foot of Mount-Safa for the first time and asked the people, what do you think about me, everyone gave the following same answer.

"In you we have never seen anything but the truth."

- iii. People used to place their trusts with him for safety because they believed in his truthfulness and integrity.

(Biography of Ibn Hisham Vol. 2, p. 298)

- iv. Abu Jahl, who was the fiercest enemy of the Prophet (PBUH), he said: "I do not say that you are a liar, but I do not believe that what you are preaching is correct"

(Tirmidhi).

No one can be named in the entire history of mankind whose addressees have such an unusual positive opinion about his life and character even inspite of severe opposition, which is a great proof of his being the Messenger of Allah.

Is it just a coincidence that all the thousands of prophets who came to the world had good deeds? Not one of them is out of the way. Probability theory of statistics will also decide that this is not possible just by chance. Then what other

explanation can there be for this fact than that these people were sent by God and kept them in His guidance, and their lives became an example for humanity.

- b) **The Supremacy of the Prophet's Words:** All the prophets who came, their words were full of such great aspects that were not enough for ordinary people to describe. Similarly, in the sciences and arts in which people were skilled, the Prophet who came to them had capabilities of said domain above than all the people, which is a sufficient proof that these people were nominated by Creator.
- c) **Basis of Preach:** Thousands of Prophets and Messengers who came to the world were sent to different regions in different periods. Although their times and eras were different, but the basis of their preaching was on the same central point that people should not worship except God, which was mentioned in the Holy Quran as:

"And We sent a Messenger to every nation, commanding him to worship only Allah and avoid other gods" (Al-Nahl: 16:36).

The nations to which the Prophets (peace be upon them) came still believe in Allah in one form or another, such as Jews and Christians, etc. Was it just a coincidence that all the Prophets (PBUH) called to Allah? Not a single one of them based the call other than oneness of God. The existence of this obvious fact is nothing but that there is one who sends these Chosen Beings and He is alone. No intelligent person can live without believing in God after this fact is revealed. May Allah bless us all with wealth of faith and protect our faith. (Ameen)

Chapter-5

(4). The Definite Arguments in the Divine Book and Modern Science

Allah (SWT) sent His special representatives, Prophets and Messengers, to guide the humanity and revealed teachings from the sky to them in the form of revelations. Among them, the Holy Quran was revealed on the last Prophet Hazrat Muhammad (PBUH) and God took the responsibility for the protection of the Holy Book until the end of life. This book, which was revealed 1400 years ago, let us examine some of the numerous facts in the context of current modern scientific observations and laws that imply 100% certainty. This is the data of God which will completely eliminate doubt and lead you to the destination of firm belief.

Note: It should be remembered that the Quran is not a book of 'science', but it is a book of 'signs', which contain news and facts based on the truth of many other areas, including science. The Quran is truth and science is also in search of truth, so science is finally reaching the Holy Quran. Since this is the era of scientific development and the knowledge of science is believed by people of all religions, some facts are presented here comparing the Quran and modern science:

Argument No. 1: Stages of Human Creation

God has described the different stages of bringing us into being in the Holy Quran as follows:

"Indeed, We created man from the essence of clay, then We made the sperm (drop) into an alqa (leech-like structure), then we made the alqa into a mudgha, then created bones in it, then placed flesh on the bones, then made him appear as a different kind of creature. So what a blessed being is Allah, who is the best creator among creators." (Al-Muminoon: 23:14-12)

Here are the basic steps of our creation according to this divine message:

- (i) Sperm-to-sperm fertilization (mixed sperm i.e. zygote)
- (ii) Alqa (leech-like shape)
- (iii) Mudgha
- (iv) Uzama
- (v) Flesh mounting on Uzama
- (vi) Completion of the new human being

In terms of scientific development, in that dark age, it was impossible for a human being to accurately describe such a big news 1400 years ago, the stages of which science has recently been able to discover with the help of powerful modern equipment, except that the Creator himself reveal this news to someone. The objection made by non-believers on said stages are attached at end as Appendix.

Argument-2: The Creation of Man in Three Layers of Darkness

Allah creates man behind three layers of darkness, which was also confirmed by science. So according to Professor Dr Keith Moore, the three dark veils mentioned in the Holy Quran are:

- i. An interior wall of the uterus
- ii. Womb wall
- iii. Embryo and the membrane wrapped around it

1400 years ago, Allah Almighty announced this fact to his chosen Prophet (PBUH) in Holy Quran as:

"And He continues to give you one form after the other within the three dark curtains in the wombs of your mothers. This is Allah who is your Lord, besides whom there is no god, then where are you wandering?"

(Al-Zumar: 39: 6)

God has introduced Himself that He is the one who creates you within three layers of darkness, then why do you not accept this fact and where are you going astray?

The question arises whether 1400 years ago these words accidentally came out of the Holy Prophet's tongue, while in that period neither this matter was discovered scientifically, nor was it observed. Thus, with this single argument, it is again proved that this book was revealed by Creator.

Argument- 3: Everything in Pairs is a Great Argument

The people of ancient times did not know that like humans and animals, plants and other creatures also have male and female genders. Modern botany has discovered that plants also have male and female parts, even unisexual plants have male and female components. According to modern botany, male reproductive organs in plants are stamens and female reproductive organs are ovules. When the pollen reaches the flower, the process of fertilization takes place, thanks to Him who turns the flower into the desired fruit in which seeds are produced which lead to further propagation of the species. 1400 years ago this news was given in Holy Quran like this:

"Pure is He Who created all kinds of couples, whether they are from the plants of the earth or from their own kind (caste) or from things that they do not even know" (Yasin:36:36)

Modern discoveries indicate that apart from animals and plants, inanimate objects also have pairs like negatively charged electrons and positively charged protons, positive and negative charge poles etc. The famous scientist Deraq won the Nobel Prize in 1933 for the discovery of positive and negative pairs (Particle & Anti Particle) in matter, while the Holy Quran described it 1400 years ago.

Worth Noting: In such a dark age when it is impossible to test such things through observations, can someone give such definite news just by chance? Surely, such information could only have been given by the One who created the objects.

Isn't this one verse enough to accept the truth and believe on Almighty Allah?.

If you think impartially and act fairly, it will become clear to you that the fact, that 1400 years ago, such things (including creative stages of our growth and many other factual information) stated in this book is true and correct. There is clear evidence of God's existence that cannot be denied as acknowledged by experts of this field.

Necessary Conclusions from the above Verses: The following three necessary conclusions emerge from the above facts:

- I. Quran is a true book
- II. The language from which the words of the above verses came out is the true Messenger of God
- III. The existence of Creator has been proved

The only way to prove wrong: The only way to prove the above three conclusions wrong is to prove that someone inserted these things in the Holy Quran after the scientific facts were revealed, that is, in the modern era. But it is not possible to prove this because the Holy Quran has been passed down from time to time and since 1400 years not even a letter of it has been changed. Therefore, if it is judged fairly, there is no other option but to accept the above mentioned three things. So fortunate are those people who believe in Allah and His Messenger (peace be upon him).

Argument-4: The Solar System is not Stationary

For a long time, scientists and European philosophers believed that the earth stood still at the center of the universe and all the planets, including the Sun, revolved around it. Let us now look at the truth of the Holy Quran and believe in our Lord Who says:

"And it is Allah Who created the night and the day and created the sun and the moon, all of them are floating in their own heavens" (Al-Anbiya: 21:33)

Facts that could not be revealed to astronomers until a few hundred years ago, about which progress in the right direction began in 1609, to be described with complete accuracy 1400 years ago is a fact that cannot be ignored. It is neither possible to disprove it, nor is there any explanation possible except that He Who created these planets, Who is watching over them, Who bound them to move, it is His saying only. Even after understanding these verses, did you not feel the desire to know what is the origin of the knowledge presented in the Holy Quran? Who is that God? Which is driving the sun, moon and other planets?

Argument-5: The Expanding Universe

In 1925, the American astronomer Edwin Hubble proved from observations that all galaxies are moving away from each other, that is, the universe is constantly expanding. This fact was described in the Holy Quran 1400 years ago. Allah says:

"And We have created the sky with Our might, and We are expanding it."(Al-zariyat: 51:47)

The eminent astrophysicist of the present time in his book "A Brief History of Time" the expansion of the universe has been described as one of the great scientific and intellectual revolution of the 20th century. That Dark Age in which there was no telescope, the vastness of the universe was not discovered, was it just by chance that such a great truth was explained by the holy language of the Holy Prophet (PBUH). Is it possible to explain such a big fact just by chance? If not, then what is the thing that has kept you away from the Creator and Master of the universe?

If your heart has also confirmed the fact that:

- (1) Quran is the word of God
- (2) Prophet (PBUH) is last Messenger of Allah
- (3) Allah is the true Creator, Owner and God of this universe.

So then, thanking God, make the religion the first priority, recognize your responsibilities and make every effort to fulfill them. These few days of life are going to pass, no matter how they are spent, but how the endless time of the hereafter life will pass?

If you do not believe in Allah and the Messenger(PBUH), then you are invited to consider the above-mentioned arguments without biasing and think about the presented information whether these facts are based on authenticity or not? If you fairly think about these things, you must reach the reality. May Allah be our supporter and helper (Ameen).

Chapter-6

(5). Surprising Predictions of the Holy Quran

In this chapter, on the basis of the prophecies of the Holy Quran, definite arguments will be presented which will create complete confidence in you regarding the recognition of the truth.

In history, there are such intelligent and courageous people who dared to make predictions, but time did not confirm their fulfillment. Predictions are very easy to make but the chances of them coming true are usually zero.

You may also have noticed that people have made great predictions, but when the time comes, nothing but shame comes to hand.

But many prophecies were also made in the Divine Book (Quran) which were fulfilled word by word. The literal fulfillment of all these prophecies is a great proof that this word is from the Supreme Being Who is controlling universe, Who has the perfect knowledge of everything from start to end. Let's look at some of these prophecies and gain complete faith in Allah in which there is no room for doubt.

1) Safeguarding of the Quran

In the Holy Quran, the Creator of the universe has made a great prediction that no one can change this book. No one will be able to express the lack of words in it and it will remain in its original state until the day of Resurrection. The Lord himself took the responsibility of protecting him, so He said:

"Indeed, We have sent down this writing (Quran) and We are its guardians." (Al-Hijer: 15:9)

In another place He said:

"And indeed, this Quran is a very honorable book, falsehood cannot come in it from the front or from the back" (Hameem-al-Sajda: 41-42).

1400 years have been passed, this book is still in its original form. Although there was no formal system of print media in the early periods, even paper was not available for writing. Despite this, its survival in its original form is a great sign of Allah. The previous inspired books, the Torah, the Bible, etc., were changed in a short period of time because Allah did not take responsibility for their protection. The last book was to be a guide for the people until the Day of Judgment, so the Lord took the responsibility of keeping it in its original state, which is a clear proof that this is Allah's word and Allah is the one whose word no one can change. The survival of this book is not because no attempt has been made to change it, but because it is protected by God and He has not allowed it to be changed.

2) Prophecies about Disbelievers

As the good news were given in advance to comfort and encourage the Muslims. In the same way, the news of the failure of the disbelievers was also given ahead of time. See some such news and be proud on your luck that you believe in Allah, Who is the greatest reality in the universe.

The non-believers used every tactic to defeat the Muslims, using wealth and other resources, but Allah did not allow them to succeed and warned them of their failure before the time came. So Creator said:

“Indeed, these disbelieving people are spending their wealth to prevent (people) from the path of Allah. So these people will continue to spend their wealth, then (there will come a time when) that wealth will become a source of regret for them, then they (the disbelievers) will be defeated and those who deny will be gathered to Hellfire. " (Anfal: 8:36)

Can anyone give such great advance news except Creator? Then why you don't believe Him?

The non-believers were very proud of their power and believed that they would overcome the helpless and weak Muslims, but before the time, Allah informed them of their defeat. He said:

"Or they say, we are a dominant party, soon this party will be defeated and they will turn their backs and run". (Al-Qamar: 54:45-44).

Allah's word was fulfilled. So, after the revelation of this verse, the battle of Bader took place in which the pride of non-believers was crushed, they were defeated and they turned their backs and ran away. After this battle, when the Prophet (PBUH) came out of the tent, the above-mentioned verse was on his tongue, see (Bukhari, chapter-Tafseer).

All arguments aside! You may ignore all arguments and facts and put forward only one argument. Let all creatures together explain its justifications until the day of Judgment but can't. They only have to agree on one conclusion that either this verse was inserted in the Holy Quran after the occurrence of Bader event, which cannot be proved. Then this is the correct conclusion that this Quran is the word of God and Prophet Hazrat Muhammad (peace be upon him) is the true Messenger of Creator who discover this ultimate truth.

So, congratulations to those who have come to believe in the greatest reality of the universe i.e. the existence of God. Make this great decision immediately now because the days of life can end up at any time.

3) Threat to Abu Jahl

Abu Jahl (the worst enemy of the Prophet-PBUH) used to prevent the Prophet Hazarat Muhammad (PBUH) from offering prayer due to his opposition and enmity. The following verses were revealed to him when he used to speak harshly threateningly and say, my supporters and assembly people are the most in this valley, then Allah said:

"Surely, if he does not desist, We will take hold of his forehead hair and drag him, such a forehead is that of a false sinner. Let him call his assembly, We shall call the pawns of (Hell)" (Al-Alaq: 96: 15-18).

Hazrat Ibn Abbas (the companion of Prophet-PBUH) says that if he (Abu Jahl) had called his supporters, then the angels of punishment would have caught him at that time.

(see Tirmidhi. Tafsir of Surah Iqra)

So ultimately, Abu Jahl was humiliated and his end was terrible.

4) Ultimately, the Glorious Success of the Prophet (PBUH) of Islam

Since the decision of Creator was to raise up the religion of truth, the plans of the disbelievers could not work even if the conditions were favorable to them. God foretold the complete conquest of the helpless and weak Muslims as:

"These people want to turn off the light of Allah with their breaths, and (while) Allah has decided that He will continue to complete His light (Islam) no matter how distasteful (this task) is to the disbelievers. It is He (Allah) who sent His Messenger with guidance and the religion of truth to make him prevail over all religions, no matter how distasteful it may be to the polytheists."

(Al-Saff: 61:8-9)

It was only a short time after making this claim that the whole of Arabia came under the control of the Prophet (PBUH). A few weak & poor people prevailed over a large number of people who had stockpiles of weapons and equipment. In this way, Allah fulfilled His previous claim.

There is no other explanation possible for these facts according to the causes and sources of the world and material terms, except that our Prophet (PBUH) was the representative of God in the world, the Cosmic Power was with Him, otherwise a usual human could not do this work. This is a fact that has no precedent in human history. Even strangers admitted to this incredible situation, thus J.W.H. Stobert admitted that:

"Considering the limited means He had, and the vast and lasting accomplishments of the Prophet (PBUH), there is no other name in the history of mankind that shines so prominently as that of the Prophet of Arabia."

(Islam & its founder, p.228)

Sir William Moir said:

"Muhammad (PBUH) destroyed the enemy's plans, He waited for his success day and night with a handful of people, apparently completely unprotected, but rather like being in the mouth of a lion. He showed courage that if his example can be found anywhere, it is only in the Bible where it is mentioned about a prophet who said to God that only I am left". (Life of Muhammad PBUH, P-221)

Let's accept these facts, believe in God, His Messenger Hazarat Muhammd (ﷺ) and His Book and make them the top priority of life. May Allah grant us this blessing (Ameen).

5) Another Faith-inspiring Fact

After gaining belief in the Existence of Allah, the true Messenger of the Holy Prophet (ﷺ) and the Quran being the book of Allah, another amazing argument about other nations is presented from the same book so that faith is strengthened.

- **After the Defeat of the Romans, the Persians will again Prevailed**

The Quran gave the advance notice of the above-mentioned amazing fact as follows:

"The Romans were defeated, in the land nearby, and after they were defeated, they would soon be dominated again, within a few years. Before that and after that, the authority belongs to Allah alone, on that day the Muslims will be happy with the help of Allah, He helps whom He wills, He is the Almighty and the Most Merciful" (Rum:30: 1-5).

Two major powers in the Prophetic era were Persia (Iran) and Rome. The Iranians were fire worshipers at that time, while the Romans were Christians. The sympathies of the Muslims were with the Christians because they were people of the book while the polytheists of Macca were with the Iranians because both were priests of other than Allah. A few years

after the Prophet (PBUH) was sent, the Iranian government prevailed over the Romans, at which the polytheists were happy and the Muslims were saddened. The fire worshiper seized Roman territory and started the most severe atrocities to wipe out the Christian religion. Churches were demolished and nearly a hundred thousand innocent Christians were killed, fire pits were built everywhere and forced worship of fire and the sun was practiced. Even Rome prince decided to save himself instead of saving the country and decided to leave people and go by sea to his coastal residence in South Africa.

Much has been written about the fall of Rome. Hardly so much has been written about the end of any other civilization. The details of this decline have been recorded by "Edward Gibben" in his famous book "The History of the Decline & Fall of the Roman Empire".

Just as the Roman Empire fell, according to historians, it was not possible for it to prevail again in a few years. The infidels saw this previous action of the Holy Quran as impossible. When the above verses of Surah Rum were revealed, the infidels of Macca rejected this and Made fun of it. However, the Muslims had full faith in this decree of the Prophet (PBUH) that is why Hazrat Abu Bakar (the companion of Prophet-PBUH) made a condition with Abu Jahl that the Romans would be victorious again within five years. When this matter came to the knowledge of the Prophet (ﷺ), He said that the Quranic word (بضع) is used for the number from

3 to 10. You have reduced the period of 5 years, increase it. So miraculously the Romans re-conquered Rome within a period of 9 years. This made the Muslims very happy.

(Tirmidhi. Tafsir, Sura Room)

Now there is no way to Deny!

If it happened that half of the prophecies were proved true and the rest were false, then there would still be a case of denial, but if all the prophecies were proved to be true word by word, isn't it enough to open the windows of our mind that we believe in this truth? Can the result of these facts be any other than the authenticity of Islam?

This irrevocable fact has given such a great opportunity to recognize the truth on the basis of reason and insight that all the ways of denial have been closed. To make such a prediction 10 years before the coming time, the reasons of which are apparently going to be reversed, surely invites all the humanity to think with reason and wisdom. . What you have seen is not mere words or a novel or story to be ignored. This is a very big fact which is giving clear evidence that the Holy Quran is the book of Allah, those to whom it was revealed are indeed the Messengers of Allah and Allah is the greatest reality of universe.

In this chapter, where you got the certainty of truth, you also got some introduction to Allah that He is the One whose decisions are not hindered by time nor circumstances can change His decisions. His knowledge covers everything from

start to eternity to end. He is fully aware of what has happened and what is yet to happen.

Let's decide to have this wealth of faith in the joy of finding it, make it the first priority of our life. May Allah grant us such blessings. (Ameen).

Through this chapter, you surely got the solid belief on the following ultimate power of your Lord, as He told in the Holy Quran:

"And (every) word of your Lord is fulfilled with truth and justice, none can change His words, He is the Hearer, the Knower" (Al-Inam: 6:116)

Decide Now!

If you do not believe in the Holy Quran, then we request you to either prove what you have read in this chapter is wrong. If you can't do that, you definitely won't, then believe in Allah and His Messenger Hazrat Muhammad (PBUH) while acknowledging these facts. Real happiness will become your destiny in this world and hereafter. It is a great injustice to ignore the numerous irrefutable proofs contained in the Quran just because of misunderstanding of a few things.

Chapter-7

(6) Supernatural Affairs a Great Sign & Introduction of God

This universe is running under the rules and laws of nature. The Creator of these laws has also done many supernatural things to show people the way of his recognition, so that it becomes clear to man that these natural laws also have been created by him and running under His command. Furthermore, He can also do without these laws whenever He wants. There are many such signs, out of which only a few will be presented, which have been confirmed by time and which people have seen with their own eyes.

1) The Tale of the Cavemen

This event took place in the Roman Empire about 100 years after the Jesus. When a few youths rejected all gods except Allah in the court of king 'Adrian'. Allah wisely saved these youths and sheltered them in a cave. Then they were raised again by God after almost three hundred (300) years of sleeping during the time of king 'Theodis' who was a monotheist.

This is strange incident that happened in this land giving a definite indication of Creator and introduces His unlimited power. He is the one Who did not allow the natural laws to be

applied to them for 300 years, neither did their bodies rot, nor did animals, beasts and insects come close to them, nor did humans have access to them. Then miraculously raised them up after about 300 years so that they could see how Allah, removes the oppressive rulers and gives power to the good people. It was done by Creator because these people had a strong desire to see the dominance of the truth.

Historians have also written about this event, such as "Gibbon" mentioned in the famous book "The Rise and Fall of the Roman Empire" under the name of "Seven Sleepers". This event is mentioned in the Quran. In Quran, there is a complete chapter in the name of "Al-Kahaf". Out of which we present just only one verse for the refreshment of faith. When these young men stood up for Allah in the court of king Adrian at the time of the emperor, Allah depicted that event like this:

“And We strengthened their hearts when they stood up and said: Our Lord is He Who is the Lord of the heavens and the earth. We will never call any god but Him (Allah alone) only” (Al-Kahf: 14:18)

2) Protection of Prophet Hazrat Yusuf (PBUH)

The Jews asked our beloved Prophet Hazrat Muhammad (PBUH) about the Prophet Hazrat Yusuf (PBUH), upon which Allah Almighty revealed the entire chapter in Quran in the name of Yusuf. The brothers of Prophet Yusuf (PBUH) wanted to kill him so that His father's attention could be more towards them instead of Prophet Yusuf (PBUH). This was mentioned in Quran as follows:

"Kill Yusuf and throw him somewhere so that the attention of your father becomes pure for you and we will become righteous after him." (Yusuf: 12:9)

Therefore, his brothers taken Yusuf (PBUH) from the house to be killed, but God had decided to save him, instead of killing him, they threw him into a blind well. At the same time, Allah sent some people to this well for the purpose of searching for water and in this way made him come out of the well. Then with the passage of time, God finally saved Prophet Yusuf (PBUH) and gave him the power of Egypt, which was mentioned in the Holy Quran like this:

"And thus We gave authority to Yusuf in the country (Egypt) so that He could make a place for himself in it wherever He (Yusuf) wanted and We do not waste the reward of those who do good." (Yusuf: 12:56)

This true event indicates that surely there is a 'Creator' Who is running this universe, Who is in possession of all the laws of the universe and the circumstances of the times and all the laws follow His will. Previous heavenly Books, history and Quran are full of such events, for the sake of brevity we limit them to a few events. These events are not fictitious stories. Time has witnessed their occurrence which cannot be denied. Is this clear fact not enough for us to believe on our Lord?

3) Creation against Nature

Allah has created human beings from male and female according to the natural law, but some creations in this

universe have also been made against the norm in order to recognize the Lord.

I. Birth of Prophet Yahya (PBUH)

Prophet Zakaria (the father of Prophet Yahya PBUH) prayed for children in such part of his life when both the husband and wife were in a state of extreme old age and his wife had become barren. Allah accepted his prayer and when God sent the good news through an angel, He was very surprised that how could I have children? On this, the Lord sent an angel with following order:

“Angel said, it will be so. Your God has said that this is an easy task for Me, and look, I created you, before you were nothing.” (Maryam: 19:9)

II. Birth of Prophet Eesa (PBUH)

Prophet Hazrat Eesa (PBUH) was created by Allah without a father to make His evidence and sign. So when the angel gave the good news to Hazrat Maryam, PBUH (the mother of Prophet Eesa), she wondered that how I would have a baby as no man has even touched me? Allah sent following message through an angel:

"The angel said, 'It will happen like this,' says your Lord, this is easy for Me, so that We may make it a sign for the people, and may it be a mercy from Us, and this is something that has been decided, so she got pregnant. Then she took the child (in her womb) and went to a distant place". (Maryam: 19:21-22)

After that, when people slandered Hazrat Maryam (PBUH), Allah Almighty gave Eesa (PBUH) the ability to speak and the child of a few days said that:

“I am the man of Allah, He has given me the book and made me a Prophet”. (Maryum:19:30)

III. Birth without Father & Mother

The 1st Prophet Hazrat Adam (peace be upon him) sent to earth has no father & mother. Before the creation of humanity, Prophet Adam (PBUH) was created without a mother and without a father. These truthful facts invite us to think about our Lord & believe on it.

4) Destruction of Disobedient Nations

Many nations in the past, whom the chosen Prophets of God made every effort to explain, but when they did not believe in any way and continued to deny the truth until they wanted to kill the Prophets (PBUH), then Allah Almighty caught and destroyed them. As an argument, see the verses of the Holy Quran regarding only one nation. Nation of Prophet Nooh (PBUH) was drowned in a flood of water, Allah said:

"Until when Our order came, the oven began to heat up, so We ordered to put on board a pair of every kind of male and female" (Hood: 11: 40)

So, for several months, the water from the heavens and the earth continued to rage until all the cruel people were killed except the companions of Prophet Nooh (PBUH) who were with Him in the boat. When they all drowned, Allah Almighty

turned the water, He ordered it to stop, so the rain stopped and the water of the earth was accepted back by the earth, which is mentioned in the Holy Quran as:

“And it was said! O earth, swallow your water, and O heaven, be still, and (at once) the water came down, and the judgment was paid, and the boat landed on the Judi mountain, and it was said, Curse fell on those who were unjust.” (Hood: 11:44)

This true event that happened on the face of this earth, it is revealing the authenticity of the Quran and the Messenger and the sign of Allah, and moreover lesson in it is that the disobedience of God is a cause of great loss.

Chapter-8

Denial of God and Religion

In the previous chapters of this book, most of the misunderstandings of the deniers of God and religion (Atheist) have been resolved. Muslim and non-muslim (Non-Atheist) scholars have also written a lot against these people (Atheist). Prominent atheist 'Richard Dawkins' point out the main objections he presents to the denial of God and religion in his book 'The God Delusion'. Richard has said in the beginning of the said book that anyone who reads this book will become an atheist. When I saw the arguments in this book, my faith in Allah became more stronger (Thanks Allah). In this book, God is denied mainly on the basis of 3 arguments which are:

Objection No. 1: Different types of objects in the universe, including objects with complex structures, have come into being through Darwin's theory of evolution through natural selection.

Note: Remember that there are 3-theories about the objects in the universe:

- (i) The universe is designed or created by someone and that is God.
- (ii) Things came into existence spontaneously 'by chance'.

- (iii) As a result of the process of evolution, they came into existence (Darwin's theory).

Since scientists have already rejected the possibility of spontaneous creation 'by chance', therefore Richard prefers to base on the evolutionary process.

Objection No. 2: If it is accepted that the most complex creation of the universe is done by the Creator, then that Creator must be more complex than the universe. Then surely someone must have created it too. It would not be fair to recognize the Creator of the universe, but not to recognize the creator of the God.

Objection No. 3: Atheists found in the world are decent, moral, and balanced people, while those who follow religion are immoral, dishonest, deceitful, quarrelsome and bloodthirsty. Acceptance of religion results in good people becoming bad.

For the sake of brevity, out of these three objections, "**Objection No. 2**" is being clarified in this article, while for awareness of the reality of many other objections raised including the rest of the objections, see our article: (From Creation to Creator, Ch-7. This book is in Urdu language and in future if required, Ch-7 will be converted and added in this book).

Reply: Objection No. 2

In the above reasoning about the universe and the Creator, what we observe and which cannot be denied is that the

universe has not always existed, it is created and it has its beginning. The same is clear from the 'Big Bang' that the universe has been created by someone under a well-thought-out plan.

Now if it is thought that God will also need a creator, then the creator of every God will also have to be recognized and this chain would be endless, means every creator needed a creator. Furthermore, every next creator will become become more and more complex. Thus, this question will automatically be proved wrong. The main mistake here is to recognize the 'Creator' as a creature. Although the creature is under our observation, but the Creator is beyond our domain.

Now only two possible cases remain:

- (i) Either the universe has always existed, or
- (ii) The Creator of universe has always existed

To believe in the universe always means to deny the facts and base on lies. So the only thing that will come out is that the 'Creator of the universe' is only one and He is always existed. This fact has been confirmed by millions of true Prophets (peace be upon him) and by the last book of Allah, the Holy Quran. However, to raise objections on the eternity of God means that if we say that sugar is sweet, why is it sweet? why is salt salty?, why are bitter things bitter?..... etc. Now the other possibility that there is no creator of the universe and it has evolved into its present form by itself, is something that no rational person can imagine nor can it be proved. May God keep us steadfast on the truth (Ameen).

Denial of Creator is not Possible!

The existence of God is such a clear and great fact of the universe that it is impossible for any fair/intelligent person to deny it. The denial of Creator is actually the denial of one's own existence and the universe. Where did the meaningful, highly complex structure and functions of man come from without a designer? Has the matter itself decided to turn into a human being and has the essence of life arisen automatically in this inanimate matter? No, but it is created by the Creator, whose name is Allah, He congregates the forgetful man as:

"How do you disbelieve in Allah when you were only lifeless, then He gave you life, He will give you death, then He will again give you life, then to Him you will be returned. He is the One who created for you everything that is on earth, then He turned His attention to the heavens and made the seven heavens and He is the Knower of all things". (Al-Baqarah: 2:28-29)

Dear colleagues! Let's accept these certain facts and live with faith and belief in the Creator of the universe. May Allah grant us the blessings of this world and in the hereafter life?

(Ameen)

Chapter-9

What to do?

If you have been blessed with faith in Allah (SWT), His beloved Prophet (PBUH) & Islam, then the next important goal is to see what to do? That is, what are the basic responsibilities & rights on us required by the God? It is important to note that all the commands that God has applied to us are necessary for the welfare of this life and the hereafter. Without bringing them into life, neither our worldly life, nor the hereafter can be better.

In this regard, the list of the said instructions is given here very briefly:

(1) To seek Essential Religious Knowledge

The responsibility of detailed knowledge of religious orders is not placed on every individual, but it is obligatory on everyone to learn essential and basic knowledge. In the light of the Quran: monotheism (oneness of God), sunnah (the way of life of Prophet-PBUH), acts of worship, ethics and affairs... etc. It is important for all of us to get the recognition of religion. For the rest of the details, there must be some sincere people free from bigotry, and sectarianism in every area who will inform the people about the pure teachings of the Quran and Sunnah. Where such people are not available,

then, it will be necessary to try every one according to one's position. He who does not have the passion and desire to learn religion, he could not reach the good.

(2). Faith/Believe

Following are the basic believes:

- a) Belief on Allah: Adopting monotheism and avoiding polytheism as much as possible.
- b) Belief on Prophet Hazrat Muhammad (PBUH): as a last messenger of God to humanity until the end of life.
- c) Belief on holy book 'Quran' as a last message to humanity.
- d) Putting the belief of the hereafter in the heart.

Other Faiths: Belief on other Heavenly Books of other Prophets (PBUH) from God, Angels & destiny, etc.

Understanding them well and working hard for the maturity of faith and belief.

(3). Worship

- I. Establishing the five (05) prayers. While praying need to observe humility and submission as much as possible and keeping an eye on the meaning of the prayer, and performing the prayer in congregation (condition for men only, while for women it is optional). Prayer can be offered without the congregation under any legitimate excuse.. It is not allowed to leave the congregation without an excuse.

To understand the reasons why we need Prayer, please go through our topic: (Purpose of Prayers)

- II. Fasting during the month of Ramadan (Lunar month).
- III. Paying Zakat: For rich people whose income exceeds a certain amount (called as Nisab), they are required to donate 2.5% of its value, once per year, to designated needy recipients.
- IV. Hajj: for those who can afford it. It is obligatory once in a life.

(4). Human Rights

It is a very important requirement of the religion to purify one's actions and character in relation to the Creator and the creatures both.

The rights regarding human beings are in three forms:

- I. Sanctity of Life
- II. Protection of wealth & means
- III. Avoiding loss of honor

(I). Sanctity of life: Unjust beating, witchcraft & murder etc.

(II). Loss of Right in Wealth & Means: Getting property of others by illegal methods (theft, robbery, usury, bribery, fraud...): money, rupees, land, property, house, fruits, and robbery. In particular, not giving women their right of inheritance. Not fulfilling the responsibility of dependents. Destroying the rights of the country and the nation through the abuse of authority and power, doing one's duty/job improperly, break promises, betrayal of trust, earning illegal

livelihood, corruption, to sell impure things by mixing, less weighing , keeping a good thing in the transaction & giving bad things to others...etc.

(III). **Defamation of the right to honor:** Immorality, abusive language, unjust cursing, mocking, slandering, backbiting & committing adultery.

In this regard, generally, whatever the case may be, the following principles must be kept in mind in order to succeed:

- Truth, Justice, Honesty, Ethics and Modesty.

That is, their opposites: lies, cruelty and injustice, dishonesty and betrayal, immoral abuse and indecency should be avoided as much as possible.

Psychological Vices: In the context of human relations, the following vices regarding self should be avoided as much as possible:

(i). Arrogance: Denying the truth and treating others as inferior and contemptible, (ii). Prejudice: taking unnecessary and unfair favoritism, blindfolding means not accepting the truth even when the truth is clear, (iii). Jealousy: Especially when people come down to harm others, at that time jealousy becomes very ugly, (iv). Hatred and malice: Keeping enmity within inner self (v). Miserliness: Not spending even where there is a need, but accumulating wealth, (vi). Extravagance: Spending wealth unnecessarily, (vii). Unnecessary anger: There should be anger on some highly required occasions only, such as for committing

disobedience to Allah by your Childs etc., angering to protect from loss, etc., but anger for trivial actions should be avoided. It need to control as much as possible.

Preaching: To guide the others to the path of truth so that they can also follow the right track. It is necessary for everyone to influence their own circle: their family, friends etc.

Charity: For the sake of God & hereafter's reward, as per one's ability: Spend from your extra money, time and talents: (i) for the publication & exaltation of religion, and (ii) for human compassion (helpless, poor needy people especially for your relatives, close in your circle).

Patience in sufferings: Hardships, sufferings, pains, diseases...are part of life. Trying hard to avoid difficulties but if difficulties arise then to be patient as much as possible. Moreover, when blessings are received, avoid arrogance and be grateful.

Sacrifice: For the defense of one's religion, country and nation, if necessary & required by government, to be prepared for 'Jihad' at the call of the Islamic State. Jihad is not that everyone stands up against every one, but it is under the call of the Islamic Government for the defense of the religion country & nation against those who came to do injustice to eliminate religion/country.

Getup/Wearing: Wear the clothing as per instructions of Islam which require proper covering of private parts of body. Moreover avoid adopting wrong improper getup.

Male-Female interaction: Free mix-up of male & female is banned by Creator to control most potent intent of sex. Male-female interaction is only allowed in some special needs and interaction is restricted, no free gup-shup, so to avoid adultery and to guarantee the pure new generation. In this context special instructions about wearing has also been given in Quran.

Minimum Conditions of Salvation

The minimum conditions of salvation are described as follows by God:

“Indeed, mankind is in loss, Except for those; (1) who have believed and (2) done righteous deeds and (3) advised each other to truth and (4) advised each other to patience”. (Sura Asar:103)

Here the ‘**four minimum conditions**’ for survival are described which need to be adhered in any case:

(i) Belief: The detail is given at start of this chapter. (ii) Do righteous deeds, (iii) advise each other to truth and (iv) advise each other to patience.

If their detail is opened, these four requirements cover the whole requirement of Religion.

Why to do?

Now the next most important question remains that why to do all this? Why put your free life in this trial?

It is because of following three solid reasons:

- (1) After the end of this life, we must have to raise for new life which results either in the form of the most severe punishment (Hell) or endless great blessings in the form of Paradise.
- (2) To obey our Creator. To spend life as per direction of Creator Who created us and all other things.
- (3) Without following the Creator's direction, the life of this world cannot go well. We can't get satisfaction, real peace & happiness without following the God.

If there is no Creator, no eternal life after death...then we are free to live our lives as we wish, but sorry it is not the case at all !!!

Glimpse of Hereafter's Life:

As an example, see a few verses for a glimpse of the hereafter's life:

The situation in Hell will be like this:

"For them will be the spread of Hellfire and the covering of Hellfire, and this is what We will reward the cruel people." (A'raaf: 7: 41)

People trapped in Hell will cry & say:

“And they will shout and say in Hell: O our Lord, take us out of here so that we may do good deeds different from what we used to do. They will be told, 'Did We not give you lives long enough so that whoever wanted to be mindful could have done so? and the warner came to you. So taste the punishment, and there is no helper for the wrongdoers.’” (Fatir: 35: 37)

May Allah protect all of us from this terrible place. (Ameen).

On the contrary, the situation in Paradise will be like this:

"When you see heaven, you will see blessings and blessings spreading everywhere." (Duhr: 76:20)

The great blessings found in heaven were mapped in a very attractive way:

"And Paradise will be made very close to the pious, and it will not be far away. This is what you were promised to everyone who turns back and whoever has the invisible fear of the Most Merciful and brings a motivating heart. It will be said to him that you enter this Paradise with peace and this entry is forever. They will find there what they want, and we have much more than that (mean those blessings that man is not aware of)."

(Qaaf: 50:35-31)

Remember, since we have been born, now we have no option, no choice, we surely have to strive to protect us from eternal fire! May Allah enable us to reach in Paradise. (Ameen)

This Time will Pass!

Whether you spend your life in ignorance and merely indulge in the fulfillment of desires or in obedience to Allah, the day that dawned upon you must turn into night, and the sum of these days is called life. Every man has to fulfill his share of time. This time is passing very fast. Life is like a block of ice which will melt and disappear in front of your eyes. If you look back on your past life, the passing years look like a dream. It seems like yesterday that we were children, became young and are heading towards old age. The coming time will end in the same way. If the people who lived for thousands of years can't stay here, will we be saved? Our life is like a crop, a crop is ready and cut, and soon it is replaced by a new crop. At this time, our crop might be of 30, 40, 50, 60... years, soon this crop will be cut and a new crop will come in its place. One, who understands these facts, recognizes the real purpose and strives to achieve it before accidents, illness and death.

The famous scholar James Trifle writes:

“Oh! If the universe is going to end even after millions of billions of years, then what is the enjoyment in having or not having of this life?”

Praise be to Allah, Who guided us to truth, if He had not guided us, we never be able to reach to reality. May the blessings of Allah be on his Prophets & especially our Prophet Hazrat Muhammad (peace be upon him) who surely comes with the truth.

I am grateful to Allah Almighty, who kept me alive until the completion of this most precious writing of my life and opened the true guidance that revealed the solid faith on Him. May Allah grant us solid belief on Him and also enable us to convey this great light to others, and grant us His eternal relation in this world and in the Hereafter. (Ameen) If there is any deficiency in this writing, may Allah forgive us and increase the knowledge, actions and ranks of the friends who cooperated in it. May the best reward for this effort be given to my dear parents, especially to my beloved mother. (Ameen)

Appendix

A review of objections to the Quranic description of stages of human creation

In order to gain awareness of the veracity of the stages of human creation described in the Holy Quran, the history of genetics, the knowledge of modern science related to the science of embryology (which studies the origin and growth stages of a child) and objections from some non-religious scholars are reviewed so that the truth comes out.

History of knowledge of Genetics: *The development of this knowledge has been very slow, the real foundations of this knowledge which are very close to the truth were laid in the 19th century (AD) while this information was provided in the Quran in the 7th century (AD). The history of Genetics can be divided into four periods.*

1. Greek period (The Greeks)

- I. *In the fifth century BC, Hippocrates studied the hatching of chicken eggs to study the genetic stages. He put the eggs under the hen and observed the hatching of one egg every day, from which he concluded that the development of humans and birds is similar.*
- II. *In the 4th century BC, Aristotle in his treatise called 'Growth of the Chicken' presented the theory that the union of sperm and the menstrual blood of a woman creates an amorphous substance from which a child grows. This theory was completely wrong.*
- III. *In the second century, Galen in a treatise called "Formation of the Fetus" provided information about the beginning of the child, the acquisition of food during growth and the membranes surrounding the developing child. At the same*

time, various stages of human growth were described, some of which were correct and some were incorrect.

2. The Middle Age:

It extends to the 15th century AD. Since there were no scientific discoveries in this period, it is scientifically called "The Dark Age". In the 7th century AD of the same period, Holy Quran was revealed, in which the stages of human creation were described precisely.

3. Renaissance:

This round covers the 16th century. In this period, the correct discoveries of growth began to be made. Harvey discovered the circulation of blood but he also proposed the wrong theory that the baby is born from the wall of the uterus.

4. The Modern Age:

It is a revolutionary period starting from the 17th century, in which there was a lot of development in other scientific sciences including genetics and very important advance discoveries were made. The microscope was also invented in this period.

Current Knowledge of Genetics: Thanks to scientific progress and modern equipment, the nuances of human creation, the interaction of sperm, egg, genes and chromosomes are well known. Also, the stages of human growth have been understood and these stages have been divided into numbers like stage-1, stage-2.... etc.

The stages of human growth described in the Holy Quran and the confirmed information of modern science are completely consistent, which is also acknowledged by modern scientists.

Objections of non-religious people: Non-Muslims have made some objections to the above-mentioned stages and declared the above-mentioned division of the Holy Quran to be wrong. Like Dr. William Campbell in his book "The Quran and the Bible, in the light of History and Science" has tried to prove the Quran as a non-divine book. The following basic objections have been made to the subject verse.

First Objection:

- I. *The initial stage, which has been described as 'Alqa' by ancient religious scholars (for many years) meaning as a blood clot or clot. Modern science shows that the initial stage is like a leech-like sticky substance. This leads to the conclusion that the statement of the Quran is not correct.*
- II. *The real meanings of a word are those which the speaker or hearer take to mean. In the case of the Gospel, the same meanings of the words will be presented as they were in the first century AD. Similarly, the meanings of the words of the Quran will be the same as those used during the first century hijri.*

Second Objection: *In stage number (iv) and (v) there is a description of the formation of bones and the attachment of flesh to it. According to the Quranic statement, first the bones are formed, then the flesh grows on them, but this is not the case. Dr. Sadler, Professor of Embryology-Anatomy, states that muscles and bones begin to form simultaneously and by the end of the 8th week, very few bones are formed while muscles are able to move.*

Review of the first objection: *A few points related to this objection are presented here:*

- I. *The meaning of "Alqa" as a clot or blood clot, neither the Quran nor those upon whom this Quran was revealed stated said meaning, nor is there any evidence that any of companions of Prophet (PBUH) explained this meaning. These meanings have been explained by later commentators, which have continued to be explained until the present century.*
- II. *If it is accepted that the people of that time meant these meanings and we should not make any other meanings apart from these meanings, then this can be true for the Bible or other books because the previous prophets were sent to specific nations. It is also clear in the Bible that the message of Jesus (peace be upon him) was only for Israel and not for*

other nations (see the Gospel of Matthew, Chapter No. 6, 7, 10 & 15-24).

- III. *The message of the Holy Quran is guidance for the whole humanity because Hazrat Muhammad (PBUH) is the last prophet to whom this last word was revealed. He was sent as a mercy and a blessing to all the worlds. Therefore, Allah Almighty says:*

"(O Prophet !) We have sent you as a mercy for all the people of the world" (Al-ambia: 21:107)

In another place God said:

"This is a message for all mankind" (Ibrahim: 14: 52)

Therefore, it is proved that the meaning of Quranic words cannot be limited to the period in which it was revealed, except that Allah and the Messenger (PBUH) defined special meanings.

- IV. *In the dictionary books, the meaning of 'Alqa' is clot or leech, besides its other meanings are clinging, hanging, clinging, leech-like thing, sticky thing, etc. It is also similar to a leech because it is the wall of the uterus, it grows by clinging to it.*
- V. *It also looks like a clot in the initial stage when the pregnancy is lost and discharged. This scientific fact has also been recognized by Professor Keith Moore, see:*

(Debate entitled: 'Holy Bible and Holy Quran': Dr. Zakir Naik & Dr. William Campbell)

- VI. *The Holy Quran has mentioned stages on the basis of appearance.*

Therefore, the Quran is not wrong in the above statement. God has stated the right thing.

Review of the Second Object: *In the light of the modern research of the science of human development, Professor Keith Moore has explained the definition of the human stage 'Uzama' according to which: the initial formation of bones and muscles takes place in 25 to 40 days. During this 'Sclerotomes' are formed along with the growth of muscles called 'myotomes'. When the bone structure*

(Skeleton) begins to form, the layers of muscle bands begin to wrap around the bones in a specific pattern more or less like this. In 56th day, a 3cm long embryo is formed.

In this stage, due to the formation of the axial structure (Vertebral Column) and Ribs, the embryo is erected and become rigid. Bones are fully formed by the 42 day, while flesh formation is completed by the 7th and 8th week. The stated scientific facts prove that the order described in the Holy Quran is correct. Therefore, stating everything in the Quran correctly is a clear proof that it is from God.

Confirmation by contemporary experts:

The correspondence between the creative stages described in the Quran and the scientific facts has been recognized by eminent contemporary scholars of Genetics such as Dr. Keith Moore, Professor Marshall, Dr. Joe Simpson, etc.

Dr. Keith Moore: *He is the head of the department of Anatomy and Professor of Genetics at the University of Toronto, Canada. He is considered as one of the great experts of Al-Junain. His famous book on the above subject is 'The Developing Human'.*

A group of Muslim doctors under the leadership of well-known scholar of Yemen, Dr. Abdul Majeed Azindani, established the Department of Embryology and other scientific sciences at King Abdulaziz University, Jeddah, Saudi Arabia. They collected the above information from the Holy Quran and authentic ahadiths (saying of the Prophet-PBUH) and translated them into English and presented them to Dr. Keith Moore. When asked to comment, he admitted that "most of these verses and ahadiths are completely consistent with the latest research, but there are a few things that he cannot confirm or deny." Because modern science has not yet fully explained them. He said that, he himself does not have complete knowledge about them.

Dr. Keith Moore was asked 80 questions in the 1980s on the above-mentioned topic. He replied all questions. He said that if these 80 questions were asked to him 30 years ago, he might not have been

able to answer even half of them due to the absence of scientific information.

Dr. Keith More testified that: "The stages described by modern genetics are extremely complex and elusive. While the Quranic stages described on the basis of appearance and analogy are simple and easy to understand. I have no objection to believe that Muhammad (ﷺ) was a prophet of God because the Quran can only be heavenly book".

(Debate: Holy Bible and Holy Quran, Quran and Science: Dr. Zakir Naik)

After receiving new information from the Holy Quran, Dr. Keith Moore compiled the third edition of his book "Developing Man" in 1982. This book received the Best Book reward, and was translated into several languages. This book is also taught as a textbook in the first year of medical education.

Professor Marshall: He is the top scientist in America. He is the head of the anatomy. When he was asked to comment on the Quranic verses about growth, he said that, they cannot be explained by chance and that Muhammad (PBUH) may have had a very powerful microscope. When he was told that these verses were 1400 years ago and that the microscope was invented several hundred years later, he said:

"I see no dispute in the notion that when (the Prophet) Muhammad (PBUH) recited the subject versus of Quran, at that time surely some heavenly (spiritual) force was working with Him". (Quran and Science. Dr. Zakir Naik)

Dr. Joe Simpson: He is the Chairman of the Department of Obstetrics and Gynecology at Baylor College of Medicine, Houston (USA). He said:

"What Muhammad (PBUH) said, could not have been presented in any way based on the scientific information available at the time of the author. This not only proved that there is no difference between genetics and religion (Islam) but it was also found that religion can guide science in such a way that it continues to include some inspired revelations in

the traditional scientific way of thinking. There are statements in the Quran which have been confirmed many centuries later, which strengthens the (belief) that the knowledge given in the Quran has indeed come from God"

(Quran and Science. Dr. Zakir Naik)

During the 7th Medical Conference held in Dammam (Saudi Arabia) in 1981, Dr. Keith Moore said:

"It gives me great pleasure to explain the points presented in the Quran regarding human growth (during pregnancy) I helped. Now it is clear to me that all this information was conveyed to (Prophet) Muhammad (PBUH) by God, because more or less all this knowledge (of the revelation of the Quran) was discovered only after many centuries. This proves that Muhammad (PBUH) was undoubtedly the Messenger of God."

Hopefully, your doubts have been cleared and you have become convinced that the Holy Quran is a heavenly book revealed by the God.

Hurry Up!

There is an uncertain wall between our life and death. Every moment there is fear that this wall will break and the realities of the hereafter life will burst upon us like an immense flood. At that time, no force, no intelligence will work. Then we all have to stand in front of our Creator completely helpless.

Away from the Quranic orders, self-made thinking, following wrong beliefs and actions due to sectarianism, people who always remained indulged in desires, lost in the worldly charms, oblivious to the hereafter..... They will be put in eternal hell.

Only those people will be protected who understand the teachings of the revelation and accept it, One who, patiently controlling his desires, must have reckoned himself in the life of the world before appearing the Creator.

Therefore, avoid the deception of the cunning devil and save your this and the hereafter unlimited life by recognizing the truth as soon as possible. Hurry up, Allah guides us:

"And (O people!) follow the best thing (Quran) which has been sent down to you from your Lord before a sudden punishment comes upon you and you are un-informed. (Don't let that happen) Then you started saying, Oh, sorry! Because of the negligence that I did towards Allah. Oh, I remained among the mockers, or he said that if Allah had guided me, I would have been among the pious people, or (on the day of Judgment) after seeing punishment, he said, oh I wish! Somehow, if I am sent back (to the world), I can also join the good people. (God will say) yes, yes! Surely, My verses (Quran) had reached you, which you denied and were remained arrogant, and you remained among the disbelievers" (Alzumar: 55-59)

Our Writings

For the benefit of humanity & betterment of this & hereafter's life, Allah (SWT) enabled us for some highly beneficial inspirational life changing work in the form Books, which is based on:

“Truth & sincerity, Quran & Sunnah, Balnace, Ethics, Unification of humanity through truth & especially unification of Muslims”

This work is comprising of: Books, Pamphlets & Broshers.

- **Books:** Out of our 27 books (written in Urdu language), following books are selected to convert into English:

- 1) The existence of God..... (Completed)
- 2) Purpose of Life..... (Completed)
- 3) The way to God.....(Completed)

Following topics are under consideration:

(4) Hadyet (True Guidance), (5) Human rights in Islam, (6) Real reasons of our moral decline, (7) The real solution to our worries, (8) How to control desires, (9) Importance of Quran understanding, (10) The reality of this world and the hereafter, (11) Touheed (monotheism), (12) Risalat (requirements of Prophethood), (13) Meaning of worship, (14) The greatest cruelty, (15) Powerful devilish deceptions, (16) Unification of Muslims, (17) Do's & don'ts of Islam, (18) Islamic law of divorce, (19) Rules of male & female interaction.

- **Pamphlets:** Short writings consisting of about: 5-10 pages.

About 32 Pamphlets on highly important topics have been produced until now in Urdu language, which need to be converted into English. Out of which following are completed:

- 1) Our reality (soul & spirit).....(Completed)
- 2) What is life?..... (Completed)
- 3) True sources of real peace & satisfaction.....(Completed)

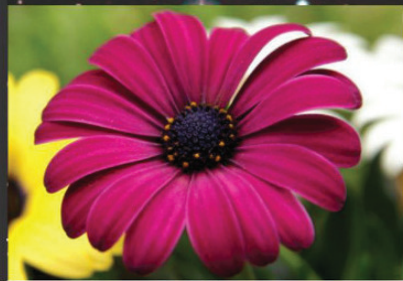

- **Broshers:** Breif single pager inspiring text on variety of important topics.

It will continuously be uploaded on web-site as developed.

You will find this work a powerful tool in awakening religious awareness. Read and let others read. This will be a continuing act of charity for you and this gift may change someone's life. May Allah keep us on truth, sincerity & right path.(Ameen).

- **Need Volunteers:** Regarding the conversion of said work in English, we will try to do it in future but need **volunteers** to help us & to seek great reward from Allah.

Look carefully at these flowers and fruits to see can these be made by themselves without designing?

A Message of Love

We love all the people in the universe to whom the message of truth could not reach. We wish them well. We want to see them to succeed in this world and the hereafter. With these sentiments and good wishes, we only request them to take some time out of their lives and read this noble article once and decide with their intellect whether this message is based on authenticity or not? If this is the truth, then accept it. Your this and the hereafter's life will become great blessing. If there is nothing in it based on truth, then guide us. This life of a few days is very precious. This temporary life is a testing ground. Live with understanding. Make the truth & fairness the aim of life, surely, you will reach the reality. May God make you successful (Ameen).

Urgent Request

By the grace of Allah, the irrefutable evidences of the recognition of the truth for the entire human race have been collected in this text. For the love of Allah and compassion for His creatures, please contribute according to your abilities. Convey it to the people of the world so that they too can get out of the darkness and can adopt the great path of real light. Surely, you will get a great reward from the Creator.
